

Poster peer reviews: Numerical Analysis

Visit at least 4 posters spending 5-10 minutes at each poster to hear about the project. For each poster you visit, provide several sentences for each of the following:

- (a) Project number
- (b) What is the big picture of the project?
- (c) What methods did they use?
- (d) What was their conclusion?
- (e) What is one question you still have?
- (f) What is one thing you think which could be improved?

When you are completed, upload your reviews to Gradescope by the end of the day. The main goal of this assignment is to force you to engage with your peers posters.
